Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)			
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:			
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:			
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).			
Box No. III	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)			
This International Searching Authority found multiple inventions in this international application, as follows:  Please See Continuation Sheet				
1.	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.  As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of any additional fees.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: 1-53 and 75-86			
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:				
Remark on	payment of a protest fee.  The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation.			
	No protest accompanied the payment of additional search fees.

International application No. PCT/US05/04811

#### BOX III. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

The International Search Authority has found 8 inventions claimed in the International Application covered by the claims indicated below: This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group I, claim(s) 1-53 and 75-86, drawn to an apparatus and system for cooking, drying and peeling shellfish products.

Group II, claim(s) 54-68, drawn to a method for processing raw seafood product.

Group III, claim(s) 69, drawn to a broth processing system.

Group IV, claim(s) 70, drawn to a food flavoring byproduct system.

Group V, claim(s) 71-72, drawn to a peeling device in communication with a dryer.

Group VI, claim(s) 73, drawn to a spiral conveyor dryer in communication with a peeling device.

Group VII, claim(s) 74, drawn to a stacked conveyor dryer in communication with a peeling device.

Group VIII claim(s) 87-83, drawn to a method for producing shellfish flavored oil.

This International Searching Authority considers that the international application does not comply with the requirements of unity of invention (Rules 13.1, 13.2, 13.3) for the reasons indicated below:

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group II which is delivering raw seafood product to a heated receptacle having a brine solution therein.

The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group III which is the brine solution from a seafood broiler is transported to holding tanks prior to packaging as a brine broth.

The inventions listed as Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group IV which is the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated.

The inventions listed as Groups I and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special

Form PCT/ISA/210 (extra sheet) (April 2005)

International application No. PCT/US05/04811

technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group V which is a screen sweeper/screened aperture providing access.

The inventions listed as Groups I and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group VI which is the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end.

The inventions listed as Groups I and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product.

The inventions listed as Groups I and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I has a special technical feature of an automated means for dumping shellfish product which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.

The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group III which is the brine solution from a seafood broiler is transported to holding tanks prior to packaging as a brine broth.

The inventions listed as Groups II and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group IV which is the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated.

The inventions listed as Groups II and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group V which is a screen sweeper/screened aperture providing access.

The inventions listed as Groups II and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VI which is the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end.

The inventions listed as Groups II and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product.

The inventions listed as Groups II and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group II has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.

The inventions listed as Groups III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group III has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group IV which is the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated.

The inventions listed as Groups III and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group III has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group V which is a screen sweeper/screened aperture providing access.

Form PCT/ISA/210 (extra sheet) (April 2005)

International application No. PCT/US05/04811

The inventions listed as Groups III and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group III has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VI which is the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end.

The inventions listed as Groups III and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group III has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product.

The inventions listed as Groups III and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group III has a special technical feature of delivering raw seafood product to a heated receptacle having a brine solution therein which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.

The inventions listed as Groups IV and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group IV has a special technical feature of the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated which is different than the special technical feature of the invention of Group V which is a screen sweeper/screened aperture providing access.

The inventions listed as Groups IV and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group IV has a special technical feature of the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated which is different than the special technical feature of the invention of Group VI which is the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end.

The inventions listed as Groups IV and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group IV has a special technical feature of the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product.

The inventions listed as Groups IV and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group IV has a special technical feature of the brine solution is extracted from the heated receptacle and injected into a heated furnace or hopper as a fine mist where it is immediately dehydrated which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.

The inventions listed as Groups V and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group V has a special technical feature of a screen sweeper/screened aperture providing access which is different than the special technical feature of the invention of Group VI which is the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end.

The inventions listed as Groups V and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group V has a special technical feature of a screen sweeper/screened aperture providing access which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product.

The inventions listed as Groups V and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group V has a special technical feature of a screen sweeper/screened aperture providing access which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.

The inventions listed as Groups VI and VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group VI has a special technical feature of the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping

International application No. PCT/US05/04811

the product to the low end which is different than the special technical feature of the invention of Group VII which is the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product. The inventions listed as Groups VI and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group VI has a special technical feature of the spiral dryer cycles the product from a low end to a high end as heated air is passed over the product before dropping the product to the low end which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil. The inventions listed as Groups VII and VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group VII has a special technical feature of the stacked conveyor dryer moves the product form one level to another as heated air is passed over the product which is different than the special technical feature of the invention of Group VIII which is extracting flavor form the pulverized byproduct into the neutral oil.
